Education

VIT Bhopal University

Bhopal, India

Bachelor of Technology in Computer Science and Engineering — CGPA: 8.19/10

2023 – 2027 (Expected)

- **Relevant Coursework:** Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, Object-Oriented Programming, Software Engineering

St. Xavier Senior Secondary School

Siddharthnagar, India

Higher Secondary Education (**District Topper**)

2023

Experience

STAQO (A Subsidiary of Sheela Foam Ltd.) — **Software Engineer Intern** May 2026 – July 2026

Noida, Uttar Pradesh

- Developed a full-stack web analytics tool tracking 4 years of **Share of Search** data for Sleepwell & Kurlon, enabling real-time competitor benchmarking and market-share estimation across the mattress industry.
- Engineered a scalable **LMS & CMS dashboard** with region-wise content personalization, employee learning analytics, and real-time sales-data integration to optimize sales-team training efficiency.
- Built and optimized a **Timefold (Quarkus)** backend in **Java**, developing an AI-optimized scheduling engine powered by constraint-solving and optimization algorithms.

GEOSTRATA (Think-Tank) — **Technical Lead**

October 2024 – August 2025

Remote

- Led end-to-end **technical operations**, ensuring high availability, performance optimization, and smooth feature rollouts across staging and production environments via streamlined CI/CD.
- Spearheaded **technical SEO** strategy (structured data, page-speed optimization, and monitoring), improving site indexing, Core Web Vitals, and organic reach.
- Bridged **product vision and engineering execution**, translating business requirements into scalable, maintainable solutions while mentoring contributors.

Projects

Serverless P2P File Transfer

WebRTC, WebSockets, TypeScript, Next.js, Node.js

- Engineered a serverless, browser-to-browser file-sharing platform using **WebRTC** data channels and **WebSocket** signaling, enabling direct **peer-to-peer** transfer of files and ZIP archives with no server storage or database.
- Implemented **end-to-end encryption** using **SHA-256** hashing and the **Web Crypto API**, securing data in transit while removing the file-size limits common to conventional cloud-based sharing services.
- Designed the ICE/STUN connection-negotiation layer to establish low-latency direct peer connections, eliminating server bandwidth costs and improving transfer throughput.

Automated Email Warm-Up Platform

Next.js, TypeScript, PostgreSQL, Node.js, Docker

- Built a fully **Dockerized** email warm-up platform that automates inbox warm-up for newly purchased custom-domain mailboxes, progressively scaling send volume over 1–2 months to establish sender reputation.
- Automated scheduled sends and engagement simulation through background **cron jobs**, reducing spam-folder placement and improving **email deliverability** for agencies and startups.

Technical Skills

Languages: JavaScript, TypeScript, Java, SQL

Frontend: React, Next.js, React Native, Redux, Tailwind CSS, Material UI

Backend: Node.js, Express.js, Spring Boot, REST APIs, gRPC, WebRTC, WebSockets

Databases: PostgreSQL, Redis, MySQL

Tools & Platforms: Git, GitHub, Docker, AWS, CI/CD, Postman, Vercel

Concepts: System Design, Microservices, RESTful Architecture, Distributed Systems, Agile/Scrum

Soft Skills: Leadership, Communication, Problem-Solving, Team Collaboration

Achievements

- **Top 20 Finalist** — **MIT mujX HackX:** Ranked **Top 20 of 260 teams** across **60 universities nationwide**; led technical development of a data-driven solution to minimize Amazon product returns through user-behavior analysis and intelligent decision-making.
- **Top 5 Finalist** — **SPIT Hackathon:** Selected among **Top 150 of 600+ teams across India**; drove system design and performance for a real-time, web-based collaborative code editor.
- **SIH 2024 Finalist:** Cleared all internal evaluation rounds against thousands of student innovators nationwide, demonstrating strong problem-solving, teamwork, and technical depth.
